A classic that can't really die (unless if EA decides to screw up this version to like they did with the mobile version)

Playing Plants vs. Zombies was a fun trip down memory lane. It definitely still holds up as a fun and intuitive game, with its charming/cute graphics and strategic game play. I love the challenge of adapting your game plan based on nightday, zombies, and setting. Especially when you're also playing for the achievements simultaneously.

However, some of those achievements can be a real headache. Mostly the mini-game ones which took wayyyy to much time. One in particular really aggravated me with its impossibility. Towering Wisdom. This is hands down one of the best versions of one of the best games ever. Unbelievable. Unbeatable. Unique in its gameplay loop. The Xbox & DS versions are the only other versions you should consider.

One of the best games I ever played. Good and clean cartoony graphics, godly soundtrack, plenty of plants to choose from, plenty of different zombie types to fight, so many plant build options, a lot of extra content like minigames, endless modes and puzzle modes with things like playing as the Zombies. This game is just a lot of fun and I would recommend it to just about anyone.

A tower defense game where you use plants to survive a Zombie outbreak.
Bit silly yet amazing and unique concept for a game.
This unique idea made Pvz one of the best Tower Defence games of all time.

Btw - if you want to chill , you also have garden that needs tending to.

A staple of my childhood that still lives up playing it today. Tons of variety gameplay wise with the amount of plants, zombies, and fun side modes you have on offer.
